

# Eric Lin

ericlin042504@gmail.com · BS Mechanical Engineering, RIT, May 2027

Interviewing for internship and new-grad mechanical engineering roles in aerospace and defense, semiconductors, and oil and gas.

## EXPERIENCE

---

### Mechanical Engineer Intern, RMF Engineering

[EDIT: dates]

- Built and maintained Revit models of campus utility piping and tunnel systems.
- Drafted and revised P&IDs in AutoCAD Plant 3D.
- Ran pipe stress analyses in Bentley AutoPIPE and documented results for engineering review.

### Team Member, Encore Fashion Group

[EDIT: dates]

Inventory and onboarding support (non-engineering role).

## PROJECTS

---

- **The Watering Hole:** Flash-chill beverage dispenser designed in Fusion 360 across three client-driven design iterations.
- **Mini Catapult:** Statics-driven launch mechanism sized from free-body analysis before any CAD was drawn.
- **Chime Machine:** Arduino-timed solenoid striker that reached a 50 percent efficiency improvement over the first prototype.
- **Piston:** Fully toleranced GD&T drawing, machined on a manual lathe and mill, then measured against the CAD.

## SKILLS AND TOOLS

---

|                                  |                                           |
|----------------------------------|-------------------------------------------|
| <b>CAD and drafting</b>          | SolidWorks, Onshape, Fusion 360, AutoCAD  |
| <b>Plant and piping</b>          | Revit, AutoCAD Plant 3D, Bentley AutoPIPE |
| <b>Analysis</b>                  | ANSYS, MATLAB                             |
| <b>Fabrication</b>               | Manual lathe, Manual mill, GD&T           |
| <b>Embedded and mechatronics</b> | Arduino                                   |

## EDUCATION

---

BS Mechanical Engineering, Rochester Institute of Technology, expected May 2027.
